

Dunbarton Energy Committee Meeting Minutes, Mar. 17, 2014

Members Present: Bob Ray, George Holt, Lee Richmond, Wayne Bracey, Ted Vallieres, John Stevens
Meeting opened at 7:08 PM

1. Public Comment

None

2. Feb. 17, 2013 Minutes approval

Approved

3. Project reports:

* Neighbors Warming Neighbors program:

Members reviewed the thermal images taken at a client's home.

We have taken images of 3 member's homes to become familiar with the thermal imaging camera and enlighten ourselves and then took thermal images of 2 previous NWN clients homes.

The software that comes with the camera allows measuring temperatures after the fact from the images as well as creating pdf reports to give to the clients.

We reviewed the images taken for how to interpret them and analyzed what was revealed about our's and client's homes.

We will try to do more homes this spring as weather permits.

* School RCx heating system evaluation:

Some repair and cleaning has been needed to proceed with the air flow balancing, still in process.

* Central NH Local Energy Committee Roundtable:

No activity from this group since last spring.

4. Community outreach, new ideas.

*Transitions: Kris and John continue to meet with the Transitions group.

5. Publicity:

The availability of thermal images seems to be generating interest that will result in more people signing up to have their homes evaluated.

6. New Business:

None

Meeting adjourned 8:28 PM

Respectfully submitted: John Stevens

Next meeting Monday, April 21, 2014.
